COPY 1 OF 2

January 6, 1958

Dear Dan:

25X1A

25X1A

In accordance with our recent discussions with [REDACTED] we herewith submit a proposal for field service [REDACTED]

I. SERVICES TO BE FURNISHED

Baird-Atomic shall, for a period from 6 January 1958 to 5 January 1959, furnish and supply to the Government one full-time technical field engineer to install, maintain, and service the Baird-Atomic Type 5111 periscopic sextant. It is anticipated that only one engineer will be required during the contract period. Additional field engineers shall be provided for short term service when authorized by the contracting officer.

Contractor personnel shall be available for re-assignment within the continental United States or overseas upon reasonable notice.

Contractor personnel must at all times be recognized as employees of Baird-Atomic and under ^{the} administrative control. However, said personnel in the performance of their services shall be guided by and comply with the directions and requirements of the contracting officer or persons designated by him under whose authority services shall be performed in a manner satisfactory to the contracting officer.

II. CONSIDERATION AND PAYMENT

The Government shall reimburse the contractor monthly upon submission of properly certified invoices at the following rates:

- (1) Rate per man month, [REDACTED]
- (2) Quarters and subsistence, \$11 per day away from Contractor's plant.
- (3) Transportation at cost.

These rates are based on a normal 40-hour work week (8 hours per day, 5 days per week). The field engineers shall adjust their schedules to maintain a 40-hour work week. The understanding shall be, however, that the field representatives are on call 24 hours per day.

The man-month rate provides that the Government release field representatives from duty on the following eight holidays: New Year's, Washington's Birthday, Memorial Day, Fourth of July, Labor Day, Thanksgiving, Christmas, and one additional holiday to be designated by Baird-Atomic, Inc. The rate

2.

also provides that the Government be billed for the holidays and the annual two-week vacation, since the overhead rate does not include provision for vacations or holidays.

III. TRANSPORTATION

Transportation which is essential to the accomplishment of required services shall be an allowable charge. Transportation allowances shall be made for contractor personnel and their baggage and equipment from the contractor's plant to the site of work, at the site of work while on official business, between sites of work and return to the contractor's plant. Transportation, where feasible, shall be provided by the Government.

In cases where the Government does not provide such essential transportation and the contractor furnishes the necessary transportation, this expense shall be an allowable item of reimbursement.

Very truly yours,

BAIRD-ATOMIC, INC.
